

Making a WhatsApp Call

WhatsApp calls are a great way to connect with people around the world, for free, and with unlimited talking hours. You can make a WhatsApp call using your mobile or desktop.

Two types of WhatsApp Calls:

1. Voice Call
2. Video Call

Prerequisites

- An active internet connection.
- An audio output device and microphone enabled or connected to the desktop.

Note: Calling is not supported on WhatsApp Web. To make Voice Calls on your computer, download WhatsApp for Windows or WhatsApp for Mac.

Voice Call

WhatsApp lets you make calls for free, even if your contacts are in a different country. Voice Calling uses an internet or Wi-fi connection.

To make a voice call,

1. On your WhatsApp, select the chat of the person you want to call.
2. Select the **Voice Call** Icon from the top right pane.

Your call is successfully made. During the call, mute or unmute yourself using the microphone icon. To finish the call, click **End Call**.

Note: You can switch from an ongoing voice call to a video call. To switch, select the video call icon on the screen of the ongoing call.

Video Call

WhatsApp lets you make calls for free, even if your contacts are in a different country. Video Calling uses an internet or Wi-fi connection.

Prerequisites

- An active internet connection.
- An audio output device and microphone enabled or connected to the desktop.
- Enable the camera in the installed app.

To make a video call,

1. Open the private chat of the person you want to call.
2. Click on the **Video Call** Icon from the top right panel.

Your call is successfully made. You can temporarily pause your video during the call. To pause, simply click on the video call icon on the screen. During the call, mute or unmute yourself using the microphone icon.
